

Dear Mr. Gunasinghe,

I appreciate you taking the time to review my resume. I wanted to take this opportunity to introduce myself and express my interest in joining the Bath & Body Works team. With my background in full-stack web development and experience building intelligent systems and data-driven applications, I would love to contribute to the company's digital initiatives.

Throughout my time at Penn State, I have taken courses that have improved my programming skills across multiple languages. As seen on my resume, I have extensive experience using JavaScript, Python, SQL, and C, among others, through courses such as Object-Oriented Programming and Applications Programming. I thrive in environments where I can solve complex problems and develop applications that are both user-friendly and efficient; I have applied these skills as a full-stack developer for CropSmarts, a developing application designed to assist farmers and agriculturists. I am especially excited about the opportunity to contribute to a company that blends technology with customer experience, an area where Bath & Body Works excels.

I understand that Bath & Body Works is continuously evolving its digital presence and optimizing its e-commerce experience. One initiative that I am particularly interested in is the generative AI fragrance finder, which I read about online. This aligns closely with some of my personal projects; including an AI-powered platform that I developed, SlideSmart, to help students prepare for exams by extracting key topics from lecture slides and generating explanations and practice questions.

I believe that my skills and experiences have prepared me to thrive in an environment like Bath & Body Works. I would love to discuss this further—and I even have a few ideas for enhancing the company's website! You can contact me via email (jra5692@psu.edu) or by phone (570-335-3930). Thank you again for taking the time to review my materials—I look forward to hearing from you.

Best,

Jace Anderson
